I am a full stack web developer with experience in building and maintaining software for automation in industry. I have experience in designing and maintaining Fleet Management Systems (FMS) and implementing ISA-95 compliant Manufacturing Execution System (MES) solutions for the Mining industry. In addition to software development, I am a computer networking hobbyist.

Tech stack

C# (.NET framework, .NET core), **JavaScript** (Typescript, Angular), **SQL** (Oracle, MS SQL), **CISCO IOS**

Experience

October 2020. – Present:

- o **Software developer at Nignite d.o.o.,** Niš, Serbia:
  - Engaged in software development for an outsourced product - ABB's MES solution for mining. Worked on a set of software built for short interval control and execution management in mining operations. Integrated the software with other scheduling and FMS solutions using APIs or message queues. Gained hands on experience on a product that followed the ISA-95 standard.
  Stack: C# .NET framework, Entity Framework, Angular, Oracle SQL, Apache ActiveMQ, TFS

August 2018. – Present:

- o Various personal projects for experimenting with different languages and frameworks – Movie Db, Budgeting app, Historical monuments map etc.

Education/Certs

- **2023, March:** Cisco certified network associate
- **2020, June:** Microsoft Certified: Azure Fundamentals
- **2016, September:** University of Niš, Master of Pharmacy
